PROFESSIONAL SUMMARY

Full Stack AI/ML Engineer and Computer Science graduate specializing in scalable backend architectures, intelligent AI systems, and cloud APIs. Experienced in developing autonomous AI agents, RAG pipelines, and high-concurrency full-stack web platforms using Next.js, React, and Node.js. Proficient in Python, FastAPI, and database optimization with proven track record integrating LLM APIs, implementing secure JWT/RBAC auth, and delivering high-performance RESTful microservices maintaining 99.5% uptime and sub-200ms latency.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, C++, SQL, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3, SCSS

Backend: FastAPI, Node.js, Express.js, Django, RESTful APIs, JWT, RBAC, Socket.io

Databases: MongoDB, PostgreSQL, MySQL, Firebase, Schema Design, Query Optimization

AI & Machine Learning: LangChain, AI Agents, RAG Pipelines, TensorFlow, PyTorch, Scikit-learn, OpenCV, NumPy, Pandas

DevOps & Tools: Git, GitHub, Docker, Kubernetes, AWS, GCP, Linux, Postman, Figma

Core CS & Concepts: Data Structures & Algorithms, DBMS, OOPs, Computer Networks, Operating Systems

WORK EXPERIENCE

Self Employed | Full-Stack & AI/ML Developer

2025 - Present

- Collaborated with cross-functional engineering teams to build automated AI agent workflows and question generation pipelines using Python and FastAPI, producing 1,000+ curriculum-aligned datasets and reducing manual content creation by 70%.
- Integrated OpenAI and Google Gemini LLM APIs with RAG architecture to enhance semantic consistency and linguistic accuracy, achieving 40% improvement in correctness across generated domain-specific educational content.

Open Source Contributor | AI Frameworks & Developer Libraries

2025 - Present

- Developed and deployed modular RESTful backend services with 99.5% uptime, serving 500+ concurrent users on live platforms with average API response latency under 200ms.
- Enhanced backend reliability and maintainability by implementing modular service architecture and CI/CD validation pipelines, reducing runtime failures by 35% and decreasing debugging time by 50%.

PROJECTS

Pharma AI Agent – Multi-Agent Healthcare & Workflow Automation

Mar 2026 - Jun 2026

- Architected multi-agent network using Python and LangChain to automate pharmacy workflows and prescription verification, achieving 45% increase in processing efficiency and supporting autonomous cross-verification operations.
- Implemented secure JWT authentication across 15+ RESTful API endpoints and engineered RAG analytics engine that processes medical data to cross-reference drug contraindications with 95% clinical accuracy.
- Optimized MongoDB query performance through strategic indexing and schema design, reducing database response times by 60% and maintaining sub-150ms API response latency under load.

Event Gous Kratos – Scalable Event Management Platform

Jun 2026

- Constructed enterprise-grade event management platform with Next.js, TypeScript, and Node.js designed for high-concurrency scaling, handling 1,000+ simultaneous ticketing transactions and user bookings with responsive UI.
- Deployed rule-based reservation engine with PostgreSQL query optimization, processing multi-dimensional event data to deliver seamless ticketing operations with an 88% user satisfaction rating.

Afreen Mall – Full-Featured E-Commerce Shopping Platform

Jul 2026 - Aug 2026

- Architected complete e-commerce platform using React, Node.js, Express, and Tailwind CSS, featuring dynamic product catalogs, advanced filtering, real-time shopping cart management, and seamless order checkout workflows.
- Implemented secure JWT-based user authentication and integrated RESTful API endpoints for order tracking and payment processing, reducing transaction latency by 40% and ensuring end-to-end data integrity.
- Designed normalized MongoDB database schemas with strategic indexing for product and inventory collections, accelerating search query response times by 50% and maintaining sub-120ms API latency under load.

EDUCATION

B. Tech in Computer Science and Engineering (Pursuing)

2023 - 2027

MPGI School of Engineering (SOE), Nanded

Master of Business Administration — MBA (Pursuing)

2025 - 2027

Bachelor of Science — Mathematics, Computer Science & Physics (Completed)

2022 - 2025

Final Grade: A+ | CGPA: 8.5

XII – State Board | 73.17%

2022

X – State Board | 74.00%

2020

CERTIFICATIONS

- Google AI Essentials - Coursera
- SQL Bootcamp - Udemy
- Associate in IT Foundation Skills (Python) - Infosys
- The Complete Full-Stack Web Development Bootcamp - Udemy
- Python Essential Training - LinkedIn
